Data Science & Analytics - current

Online Courses
Dataquest: Data Analysis - 2019
Treehouse: Python - 2018

University of Pittsburgh
English literature & language - 2009

Experience

Senior Data Analyst
GitHub, Feb. 2021 - current
Analyst supporting GitHub **Product & Engineering** teams.

- Analyzed acquisition, engagement, and retention trends for product areas
- Categorized and analyzed OSS communities to understand project trends, usage, and retention
- Conducted TAM analysis using Crunchbase and GitHub data to determine market fit for new product line
- Created Airflow DAGs to automate manual data tasks
- Created dashboards for stakeholders to monitor key business metrics using Looker and PowerBI
- Ad-hoc analyses to answer pressing business questions using SQL and Python
- Helped launch GitHub's Analytics Primer; a course aimed at increasing data literacy and self service of data via SQL and tooling training
- Defined and operationalized the Community Health metric; a quantitative measurement of an OSS community's health
- Paired with Customer Research team to develop qualitative and quantitative research reports to understand customer cohorts
- Member of the Experimentation Committee where we helped defined experiments and key metrics as well as analyze results

Senior Product Manager
GitHub, Nov. 2015 - current
Product Manager supporting Education, Growth and Enterprise initiatives

• Product lead on GitHub's Education team; a mission driven area aimed at making CS tooling and resources free & accessible for teachers and students
• Analyzed feature launches, business metrics, and experiments using SQL and Python
• Developed strategy and vision for GitHub Classroom; an application for managing and grading student assignments
• Owned variety of product areas; User Growth, GitHub for Business, the User Profile, Team management
• Launched tool accesibility plan for GitHub Classroom that provided free key GitHub feature access for teachers and students
• Managed feedback and bugs in the GitHub Classroom community forum
• Conducted user research and usability testing with user personas
• Defined and managed quarterly OKRs for teams
