University of Pittsburgh
English literature & language - 2009

Experience

Senior Product Manager
GitHub, Nov. 2015 - current

• Product lead on GitHub's Education team; a mission driven area aimed at making computer science tooling and resources free & accessible for teachers and students
• Analyzed feature launches, business metrics, and experiments using SQL and Python
• Defined and built dashboards using Looker to have a real-time view into team metrics
• Compiled reports using Mode to analyze long-term usage and trends of business areas
• Developed strategy and vision for GitHub Classroom; an application for managing and grading student assignments
• Owned variety of product areas; User Growth, GitHub for Business, the User Profile, Team management
• Launched tool accesibility plan for GitHub Classroom that provided free key GitHub feature access for teachers and students
• Managed feedback and bugs in the GitHub Classroom community forum
• Helped launch GitHub's Analytics Primer; a course aimed at increasing data literacy and self service of data via SQL and tooling training
• Conducted user research and usability testing with user personas
• Defined and managed quarterly OKRs for teams
• Led with an experimentation by default mindset using A/B tests over full defined features to ship iteratively

Technical Product Lead
MagmaLabs, Nov. 2014 - Nov. 2015

• Managed a remote team of 10; Engineers, QA, Designer, Analyst
• Created internal development and training plans for Project and Product Managers to help with career growth
• Served as GoPro's quarterly web release manager
• Documented and executed on requirements for GoPro s quarterly homepage updates
• Oversaw project to transition Littlebits to a new payment system

Technical Project Manager, Office Manager
ModCloth, Nov. 2009 - Nov. 2014

• Helped lead implementation of Warehouse Management System; internal tool used by hundreds of warehouse workers
• Helped lead launch of Oracle software; a financial tracking application used to maintain consistency of financial data
• Project Manager to a team of Software & QA Engineers, PMs, Designers, and stakeholders
• Created a new template for documenting user stories to help provide clarity and scope to Engineers
• Helped to organize a yearly internal hackathon for 80 remote and in-house team members
